Dart,

I've been through the ringer with your legal department and they had the nerve to send me back over to you for "any further questions" after mailing me a box of files so heavily redacted that they're basically just long lists of prepositions.

This cute little game you're playing is starting to border on obstruction.

Olive Hansson, Esq.

Mr. Dart,

I'm a reporter with the Monongalia Herald, currently doing some work on a piece about the continued lack of compensation for the families of victims of the Strahlenberg Blast. The former Strahlenberg company website lists you as the contact for inquiries of this nature, so I did some digging and found your email address (I think you forgot to list it on the website).

Would you be able to answer a few questions via email, or to meet somewhere in person?

I was also wondering if it would be possible for me to take a look around the site of the former mine. I just want to get a feel for the layout of the mine and the extent of the damage that took place.

Thanks in advance,

Colin Monaghan

>SUBJECT: Requesting password to Strahlenberg Zone
>DATE: 3/18/1990 8:24 AM
>TO: [REDACTED]
>FROM: [REDACTED]

Hello Stanley,

I know that we're focusing on alternate suppliers until public scrutiny settles down and we have the resources to set up a more permanent operation, but I was hoping to get one last look at the spatial disruptions taking place beyond a certain Sector 3 Zone that starts with the letter P (trying to be vague here since I know how much you hate paper trails) before my transfer to Villalobos. It's been such an illuminating few months, but I still want every bit of data I can get.

Just one problem- I seem to have lost track of the password to that particular Zone, and your people won't let me in even though they must have seen me around here a dozen times. Help me out?

Claudia,

The OS Associates are simply performing their jobs by not letting you through.

You're fully aware that I'm not supposed to communicate that information directly over this medium, and neither should you. A paper trail in any form undermines the entire password system and yes, that includes even a single letter.

Additionally, there are three Zones in the deepest reaches of the mine that happen to begin with the letter "P," and I'm not sure which one you're talking about. I suppose you can't possibly be referring to Pergamon, since that Zone is currently undergoing Level 3 Lockdown Procedures while the biohazardous remains produced by your most recent experiment are dealt with. But that still leaves two options.

Since I don't want to trek all the way down through Hades to get you through myself, I'll let you know just this once that it's either Commodore Amiga 500 (Cjacjadb or Commodore Amiga 500 % YmfsfytX. You'll have to figure out the rest for yourself.

Hello!

I don't know if my previous inquiry made it to you, but I'm following up on my request for access to the Strahlenberg mine.

Is there a better way to get in contact with the company, or anyone else I should be speaking to if you're not the one I'm supposed to be reaching out to about this? Looking forward to hearing back from you.

Thanks again,

Colin Monaghan

Hey there Stan,

I don't know if my previous inquiries made it to you, but I thought I'd go ahead and follow up on my follow-ups. I'm still interested in looking around the Strahlenberg mine, and don't plan on losing interest anytime soon.

Look forward to hearing from you,

Colin Monaghan

ACTIVITY DETECTED IN STRAHLENBERG MINE ZONE CALES AUTH # 24-19-0-22-0

SUBJECT: ALERT: Security Breach
DATE: 4/22/1990 4:26 AM
TO: [REDACTED]
FROM: [REDACTED]

Operational Security Associates have apprehended a trespasser at the Strahlenberg location. The trespasser has identified himself as a reporter by the name of Colin Monaghan. He claims that he entered the premises alone. His personal effects have been confiscated and assessed. They consist of:

- One (1) leather messenger bag, within which the following items were stored
- One (1) 35 millimeter SLR Camera
- Three (3) energy drink containers, two (2) of which were empty and one (1) of which was full and as-yet unconsumed
- One (1) half-full pack of chewing gum
- One (1) fast-food receipt
- Two (2) notepads containing various notes concerning Luxetumbra Venture Laboratories, the Strahlenberg Mining Company, David Griffith, as well as various unconnected matters.
- Six (6) various writing implements
- One (1) week-old ticket stub for a 7:25 showing of the film "Tremors"

He is currently being held at an off-site location pending orders.

Ensuring the safety, security, and general well-being of LVL assets both organic and inorganic.

Please relate the following to the individual in question:

While I cannot disclose any information regarding the mine to him, as he has not acquired clearance through the proper channels, I can offer him something that might perhaps be of an even greater journalistic interest: a hands-on tour of one of our largest facilities. The scientists at Veneno can provide Mr. Monaghan all of the answers he's seeking and then some.

Arrange transport and see to it that whatever vehicle he arrived in is taken care of in his absence.

Mr. Dart,

A few days ago, a colleague of mine by the name of Colin Monaghan stated his intention to examine the perimeter of the Strahlenberg site to me.

He has not come into work since leaving to do just that, and is not responding to any of my calls or emails. I was wondering if you had seen or heard from him at all in the past week?

Ms. Oliviera,

I am so sorry to hear the concerning news regarding your colleague.

I have not spoken to any reporters on the premises. However, searching through my inbox I now see that I have indeed received several emails from a Mr. Monaghan- I am a very busy man, and must have overlooked them initially. I will alert you if he makes any further contact with me, but the last correspondence I received from Mr. Monaghan was over two weeks ago. Perhaps he has simply fallen ill and failed to notify you.

Best of luck,

Stanley Dart

>SUBJECT: Conclusion of your Strahlenberg Post
>DATE: 8/4/1990 10:58 AM
>TO: [REDACTED]
>FROM: [REDACTED]

Mr. Dart,

You have performed adequately since your initial assignment. The lack of further security incident since the disruption in April of this year has indicated that your time and energy would be better utilized elsewhere.

The Strahlenberg site, including your off-site office facility, will lay dormant with the exception of automated security and quarterly site assessments until further notice.

Your office in Cooper's Rock will be purged of all documentation by OS Associates by noon of August 6th.

You have been re-assigned to a Public Relations Management position at the active Blancours site.
Transportation will arrive for you shortly.

We eagerly anticipate your cooperation.
